Postdoctoral Associate  
Basic Science & Craniofacial Biology  
New York University College of Dentistry

A fully funded postdoc position is available immediately in **Juhee Jeong** Lab in the Department of Basic Science & Craniofacial Biology at New York University College of Dentistry, New York.

Candidates should have a PhD in biology. Previous experience of working with mice is not necessary, but the applicants should be proficient in common molecular biology, biochemistry and cell biology techniques. In addition, they should be self-motivated, organized, and able to communicate effectively to work as a part of the team. The position offers competitive salary, excellent benefits, and exposure to a rich environment at NYU and the New York City area.

To apply, please send your CV including a brief description of past research experience and contact information for three references to the following link: [http://apply.interfolio.com/62167](http://apply.interfolio.com/62167)
